

SG/PSL Analyser

Specific Gravity and Percent Solids Sampling Scale

Model PSL200

Features

Digital operation – no calculations required

Long battery life, automatic sleep mode while not in use to reserve battery life

Large daylight viewable, 16 digit liquid crystal display

Large volume 316 Stainless Steel sampling container with slotted overflow for precise SG/PSL measurements included

1 to 30kg sample range

Specific Gravity accurate to 3 decimal places

Percent Solids accurate to 2 decimal places

Light weight, robust housing for field measurements.

SG/PSL continuously displayed

SG Range 1.000 to 9.999

PSL Range 0 to 100%

Operation

Continuous SG Measurement

- Tare empty container
- Calibrate water

Continuous PSL Measurement

- Calibrate SG
- Set Density of Dry Solids (SS)
